

Rail transport in Estonia

Balti jaam (*literally* the Baltic Station) is the main passenger railway station of Estonia's capital Tallinn.

Stadler FLIRT in Keila station.

The **rail transport system in Estonia** consists of about 1,200 kilometres (750 mi) of railway lines, of which 900 kilometres (560 mi) are currently in public use. The infrastructure of the railway network is mostly owned by the state and is regulated and surveyed by the Estonian Technical Surveillance Authority (Estonian: *Tehnilise Järelevalve Amet*).

All public railways in Estonia are 1,520 mm (4 ft 11 ²⁷/₃₂ in) (Russian gauge), the same as in Russia, Belarus, Latvia, and Lithuania. The 1,520 mm gauge used in Estonia is also compatible with Finland's 1,524 mm (5 ft) gauge. Sometimes it is defined to be 1,524 mm (see Rail gauge in Estonia), for example when buying track maintenance or vehicles from Finland.

Railways in Estonia today are used mostly for freight transport, but also for passenger traffic. Passenger transport is most frequent near Tallinn, centred on the main Balti jaam.

1 History

Main article: History of rail transport in Estonia

2 Network

A train embarking from Saue railway station

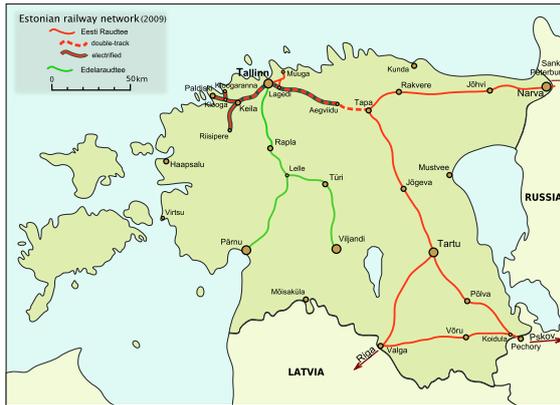

- Total length: circa 1,200 km, of which 900 km in public use^[1]
- Gauge: 1,520 mm (4 ft 11 ²⁷/₃₂ in) Russian gauge
- Electrified: 133 km (83 mi).

The Estonian railway network is owned by the state-owned company **AS Eesti Raudtee** and the private company **Edelaraudtee Infrastruktuuri AS**. These railway network infrastructure operators provide all railway network services for railway operators running freight and passenger services. AS Eesti Raudtee provides approximately 800 kilometres (500 mi) of track, of which 107 kilometres (66 mi) is double track and 133 kilometres (83 mi) is electrified. Edelaraudtee Infrastruktuuri AS maintains 298 kilometres (185 mi) of track which consists of 219 kilometres (136 mi) of main line and 79 kilometres (49 mi) of station line.

2.1 Main lines

Owned by AS Eesti Raudtee:

- **Tallinn–Tapa–Narva**, 209.6 km (130.2 mi). This line was completed in 1870. It was originally a

*Railway lines in public use as of 2008.
(Note: Koidula station in southeast Estonia is under construction and scheduled to be completed by 2011.)*

All railway lines in Estonia (including demolished)

part of the railway network of the Russian Empire, connecting Paldiski to St. Petersburg via Tallinn and Narva.

Passenger trains are operated by Elron (Tallinn–Aegviidu, Tallinn–Tartu, Tallinn–Rakvere and Tallinn–Narva routes) and GO Rail (international trains to Moscow and St. Petersburg, Russia).

- **Tallinn–Keila–Paldiski**, 47.7 km (29.6 mi). Passenger trains are operated by Elron (Tallinn–Pääsküla, Tallinn–Keila, Tallinn–Paldiski and Tallinn–Klooga-rand routes).
- **Keila–Riisipere**, 24.4 km (15.2 mi). This line is part of the former Keila–Haapsalu line, that was completed in 1905. Riisipere–Haapsalu section was abandoned in 2004.^[2] Passenger trains are operated by Elron (Tallinn–Riisipere route).
- **Tapa–Tartu**, 112.5 km (69.9 mi). Completed in 1877.^[3] Passenger trains are operated by Elron (Tallinn–Tartu and Tartu–Jõgeva routes).

- **Tartu–Valga**, 82.5 km. Completed in 1887.^[3] International connection from Valga in Estonia to Valka in Latvia. Passenger trains between Tartu and Valga are operated by Elron. Passenger trains between Valga and Riga are operated by Latvian Railways.
- **Tartu–Pechory**, 83.5 km (51.9 mi). Built between 1929 and 1931. International connection from Koidula railway station (Koidula) in Estonia to Pechory in Russia. Passenger trains are operated by Elron (Tartu–Koidula route).
- **Valga–Pechory**, 91.5 km (56.9 mi). Part of Riga–Pskov railway, which was opened to regular traffic in 1889.^[3] International connection from Koidula railway station in Estonia to Pechory in Russia. The line is used only by freight trains.

Owned by Edelaraudtee Infrastruktuuri AS:

- **Tallinn–Lelle–Pärnu–(Mõisaküla)**, 141.4 km (87.9 mi) (formerly 190.0 km). International connection has existed from Mõisaküla to Latvia, but the stretch Pärnu–Mõisaküla was abandoned in 2008.^{[4][5]}
- **Lelle–Viljandi**, 78.7 km (48.9 mi). This line connects Viljandi to the Tallinn–Pärnu line via Lelle.

2.2 Major industrial railways

- **Põlevkivi Raudtee** (oil shale railway) maintains over 200 km (120 mi) of track in Ida-Virumaa.^[6] Main use of the network is transporting oil shale from underground and open-cast mines to the Narva Power Plants. The company is a subsidiary of Eesti Põlevkivi, which itself is a subsidiary of Eesti Energia, owned by the state.
- **Rakvere–Kunda**, 19 km (12 mi). Built in 1896,^[7] this line connects the industrial town of Kunda to the Tallinn–Tapa–Narva line. The line is owned by private company Kunda Trans.

3 Connections to adjacent countries

Daily passenger services connect Tallinn with Moscow (night train; travel time is 15 hours), and Saint Petersburg, both operated by the Estonian company GoRail.

As of summer 2008 three daily trains operated by Latvian Railways connect Riga (Latvia) to Valga (Estonia). The other railway lines to neighbouring countries are not used for direct passenger traffic at the moment. It is possible

to travel between Tallinn and Riga with train change at Valga, and the timetables of Tallinn–Valga and Valga–Riga are adjusted for that purpose, but this still takes a long time compared to bus (travel time about 5 hours) or air.

Historic lines are Tallinn–Moscow via Tartu–Pechory, and Riga–St. Petersburg, which passed through Estonia from Valka, Latvia to Valga, Estonia–Võru–Piusa–Pechory, Russia. Both were closed in the 1990s.

There are plans for a new high-speed line Tallinn–Riga (continuing to Poland), Rail Baltica, planned to be in operation around 2020.

3.1 Railway links with adjacent countries

- Same gauge:
 -  Latvia – yes
 - at Valga – diesel trains only
 -  Russia – yes
 - at Narva – diesel trains only
 - near Võru – diesel trains only

4 Operators

Freight trains are operated by Eesti Raudtee and private companies including Estonian Railway Services (E.R.S. AS),^[8] and Spacecom.^[9]

Passenger services are offered by three operators:

- Elron, domestic routes
- Go Rail, Tallinn–Saint Petersburg and Tallinn–Moscow
- Pasažieru vilciens, Valga–Riga
